

INDOOR BASKETBALL EQUIPMENT

S04110

S04110 “Easyplay Official” portable basketball backstops dynamically counterbalanced (patented system), with projection of 340 cm (granting 200 cm free space from protective pad to end line of basketball court). FIBA approved for International competitions. Power coated steel structure realized with large section steel profiles. New-design anti flexion main projection arm made in stamped steel plate. Easy movement from rest to play position (basket or minibasket heights without any further adjustment of board) just by pulling or pushing the structure (even one man without any problem); aid by the adjustable counterweight placed inside the base. Easy to roll away on the floor by means of total 6 anti-trucking wheels: 2 pivoting wheels on the front part of base and 4 fixed on the back part of base (2 in line on each side). Mechanic completely hidden device applied on the base for moving up and down all the 6 wheels at the same time both with backstops in rest position or in play position and for raising and lowering the complete base at the same time in a levelled position (do not require any type of “sub-frame”). Dimensions of base cm 230x110 (not including pads). New revolutionary mechanical guides device applied inside the main projection arm in order to keep the board always perfectly vertical at any height. Fully padded for maximum safety by means of high resistance pads applied on the main vertical column, thickness 15 cm, on the base and on the main arm. All pads are covered by synthetic material, washable and antibacterial. The Easyplay Official set includes backboards made of 12 mm tempered safety glass, with high resistance pads and equipped with red light device to be connected to any 24” shot clock, and approved reclining rings as well as with accessories for fixing the base to the floor. Total weight of each structure around 1.400 kg. Dimensions in rest position around cm 505x190x200h. Minimum space required for positioning cm 450 over the end line of playground. **The system has been approved by the F.I.B.A. for international competitions.**

PICTURE: S04110

ADVANTAGES COMPARED TO OTHER UNITS:

- no oleo dynamic units, no springs ... that means no need of any maintenance or adjustments of springs load time to time;
- wheels movement independent from raising-lowering movement ... that means you can easily move the unit on the ground even if it is in play position;
- one man can raise and lower and move it in the ground very easily;
- the board is always perpendicular at any height (basket or mini basket);
- you can adjust position of board (vertical – perpendicular) even with unit in rest position, very comfortable, and than move the unit to play position (board will be as perfect as after adjustment);
- strong tubular arm with high section reducing vibrations of board after slamming;
- base completely covered by pads.

Protective pads can be customized choosing different colours and printing logos!
